BB 100 Molecules of Life
Syllabus for Ecampus

INSTRUCTOR INFO
Dr. Kevin Ahern
Office ALS 2145
Contact: ahernk@onid.orst.edu or phone 541-737-2305

COURSE PREREQUISITES
None

LEARNING RESOURCES
1. Textbook: Biotechnology for Beginners by Arnold L. Demain
2. Instructor notes, practice exams, and audio/video of lectures (when technical problems do not exist) will be available through the Schedule page on Blackboard.
3. Individual meetings/phone calls/ emails with the instructor are encouraged.

WEB MATERIALS
The class Web page will be active through Blackboard and will contain the schedule of topics covered in the class.

<table>
<thead>
<tr>
<th>Topics Covered</th>
<th>Textbook pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. A Taste of Biotechnology</td>
<td>1-27</td>
</tr>
<tr>
<td>2. Enzymes</td>
<td>29-55</td>
</tr>
<tr>
<td>3. The Wonders of Recombinant DNA</td>
<td>57-93</td>
</tr>
<tr>
<td>4. Cellular Factories</td>
<td>95-137</td>
</tr>
<tr>
<td>5. From Viruses to Vaccines</td>
<td>139-167</td>
</tr>
<tr>
<td>7. Green Biotechnology</td>
<td>197-233</td>
</tr>
<tr>
<td>8. Cloning and Transgenic Organisms</td>
<td>235-261</td>
</tr>
<tr>
<td>9. Health and Biotechnology</td>
<td>263-291</td>
</tr>
<tr>
<td>10. Genomics</td>
<td>293-333</td>
</tr>
</tbody>
</table>

Ecampus students should be aware that videos are sometimes used from a previous term. Consequently, dates, as discussed in the videos may not
match dates of the course. The correct dates for all matters in the course are given on the Schedule page.

**EXAMINATION INFO**
(I) Exam #1: Announced on the Schedule page on Blackboard  
(II) Exam #2: Announced on the Schedule page on Blackboard  
(III) Final Exam (comprehensive) - Announced on the Schedule page on Blackboard

**EXAM POLICIES**  
Ecampus exams are taken online on Blackboard and require proctoring. Proctors must be arranged with and approved by ecampus at the beginning of the term. Contact them at  
http://ecampus.oregonstate.edu/services/proctoring/finding_proctor.htm or at 800-667-1465 or 541-737-9204. It is required that exams be taken within the time “window” shown on the Web page. Failure to follow these instructions will result in voiding of the exam and assignment of an ‘F’ grade.

Makeup exams will be given only for absences excused by the instructor in advance of the exam. Excused absences will not be given for airline reservations, routine illness (colds, flu, stomach aches), or other common ailments. Excused absences will not be given after the absence has occurred, except under very unusual circumstances. Regrades of exams will be performed when there is an error and the student requests it. All requests for regrading must be made in writing/email within three days of the day the exam is returned to the class as a whole. After that period of time, grades will be fixed and will not be changed. Regrade requests must clearly explain why the original grading was either incorrect or misunderstood. Illegible, misspelled, or unintelligible written requests will automatically be denied.

Makeup exams 1) are of a different format from the classroom exam and 2) are designed NEVER to be easier than the classroom exam. The following situations are NOT grounds for missing an exam:

1. You misread the date of the exam on the syllabus.  
2. You went to the wrong room.
3. You did not get the proctor approved and/or exam arrangements made in time to take the exam.
4. You waited to the last minute to take the exam and the window to take the exam expired.

**GRADING**
Course Points Distribution - Exam 1 (30%), Exam 2 (30%), Final Exam (40%).

There is no extra credit possible beyond the occasional questions asked on exams and therefore I do not (and in fact cannot) take improvement during the term into consideration in assigning grades. No fixed grading scale will be used to assign letter grades and no fixed numbers of letter grades are set. Since there is no fixed grading scale (90/80/70/60, for example) grades are therefore "curved," since this is the definition of what "curved" means. Grades will be assigned on groupings as determined by the instructor at the conclusion of the course. Approximate letter grades will be given during the term. Undergraduates will be evaluated and graded separately from graduate students.

**LETTERS OF REFERENCE**
I am frequently asked to write letters of reference for students from the class. Since I must know a student personally to write a letter of reference, it is almost never possible for me to do this in the ecampus. If you are curious, I do have a written policy for letters of reference – http://oregonstate.edu/dept/biochem/hhmi/ahernletters.htm

**COURSE POLICIES**
Please note the date and time of the class exams. Reading and studying the assigned material before the lecture date is essential for success. Waiting to the last minute to study or prepare is a prescription for disaster.
POLICY ON INCOMPLETES
A grade of I is appropriate when 1) a course requirement has not been completed due to circumstances beyond the control of the student and 2) at least half of the work for the course has been completed at a level of C- or better. For medical problems that prohibited the student from fulfilling a requirement of the course, a note from a doctor is required. The request may be supplied without the note, and the request (if acceptable) will typically be granted, conditional on the note being provided later. For other circumstances, supporting evidence, such as a note from an advisor, will be helpful to the petitioner's case.

The following is a list of reasons that are not acceptable:

- The course proved to be more time-consuming or difficult than expected.
- Work in other courses ended up taking too much time.
- Work or travel associated with a job ended up interfering with course work.
- Time conflicts prohibited contact with the instructor or TAs during office hours,
- The student misunderstood the requirements or grading schemes of the course.
- The student wishes to avoid a low grade.
- The student wishes to retake the course at a later date

LEARNER OUTCOMES
The intention of the course is for students to:
1. Acquire basic technical language used in modern biotechnology
2. Recall key elements of basic biotechnology principles, including cell types, enzymes, relevant molecules, historical information, viruses, cloning, and genomics
3. Communicate (through writing) key concepts relevant to biotechnology
4. Understand and apply simple concepts of biotechnology to relevant,
specific problems.
5. Gain perspectives of how biotechnology has in the past and will in
the future impact our lives

LEARNER EXPECTATIONS
1. Advance preparations, including reading relevant information before
lectures are given.
2. Avoid last minute studying
3. Questions to answer concepts/processes that the student does not
understand BEFORE it is too late.
4. Recognition that an understanding of a complex topic like biochemistry
requires considerable background prior to the class, a considerable amount
of information to be acquired in the class, and sufficient time and effort to
put these together to master the material.

GENERAL OSU AND DEPARTMENTAL POLICIES
Please note: "Students with documented disabilities who may need
accommodations, who have any emergency medical information the
instructor should know, or who need special arrangements in the event of
evacuation, should make an appointment with the instructor as early as
possible, no later that the first week of the term. In order to arrange
alternative testing, the student should make the request at least one week in
advance of the test. Students seeking accommodations should be registered
with the Office of Services for Students with Disabilities."

The Department of Biochemistry/Biophysics follows the university policies
on student conduct. These can be found at
http://oregonstate.edu/admin/stucon/regs.htm.

Cheating or plagiarism by students is subject to the disciplinary process
outlined in the Student Conduct Regulations. Students are expected to be
honest and ethical in their academic work. Academic dishonesty is defined
as an intentional act of deception in one of the following areas:
*cheating- use or attempted use of unauthorized materials, information or
study aids
*fabrication- falsification or invention of any information
*assisting- helping another commit an act of academic dishonesty
*tampering- altering or interfering with evaluation instruments and
documents
*plagiarism- representing the words or ideas of another person as one's own
Behaviors disruptive to the learning environment will not be tolerated and will be referred to the Office of Student Conduct for disciplinary action. “The goal of Oregon State University is to provide students with the knowledge, skill and wisdom they need to contribute to society. Our rules are formulated to guarantee each student's freedom to learn and to protect the fundamental rights of others. People must treat each other with dignity and respect in order for scholarship to thrive. Behaviors that are disruptive to teaching and learning will not be tolerated, and will be referred to the Student Conduct Program for disciplinary action. Behaviors that create a hostile, offensive or intimidating environment based on gender, race, ethnicity, color, religion, age, disability, marital status or sexual orientation will be referred to the Affirmative Action Office.”
